(54) FOLDABLE FILE FOR DOCUMENTS

SPECIFICATION NO. 1,231,715

By a direction given under Section 17 (1) of the Patents Act 1949 this application proceeded in the name of ETABLISSEMENT WALMECA, A LIECHTENSTEIN BODY CORPORATE, C/O MR. PETER MARXER, POSTFACH, VADUZ, LIECHTENSTEIN.

THE PATENT OFFICE

R 3280/5

According to the invention, a foldable file for documents comprises a foldable cover having a front panel and a rear panel connected along a fold line, a plurality of thumb-indexed leaves fixed in the cover at or adjacent the fold line thereof, and two inwardly foldable flaps respectively carried along two adjacent free edges of the rear panel.

One embodiment of the invention is shown by way of example in the accompanying drawing, in which the figure represents a perspective view of a foldable file for documents.

This foldable file consists of a cover formed by a folded sheet 1 the front panel of which is designated by 1a and the rear panel by 1b. This latter is provided along its lower and right hand edges, as seen in the drawing, with two flaps 1c, 1d respectively, foldable inwardly and intended to prevent documents inside the cover from falling out, particularly when the cover is held in a vertical plane.

The cover encloses eight partition leaves 2, which are fixed at or adjacent the fold line of the cover, for example by stapling, each leaf being provided at its right hand edge with a thumb index 2a, afforded by cut-outs of different heights for the respective leaves.

The cover permits the filing of documents, for example notes taken each day of the week, these notes being grouped each day in dif-

WHAT WE CLAIM IS:—

1. A foldable file for documents, comprising a foldable cover having a front panel and a rear panel connected along a fold line, a plurality of thumb-indexed leaves fixed in the cover at or adjacent the fold line thereof, and two inwardly foldable flaps respectively carried along two adjacent free edges of the rear panel.
2. A foldable file as claimed in claim 1, characterised by the fact that it includes eight thumb-indexed leaves.
3. A foldable file as claimed in claim 1 or claim 2, characterised by the fact that the thumb indices of the leaves are afforded by cut-outs of differing lengths in the respective leaves.
4. A foldable file for documents, the file being constructed and arranged substantially as herein particularly described with reference to the accompanying drawing.
